GOLF OUTING

AUGUST 5, 2010

1:00 pm start

Shale Creek, located just minutes from I-71, is easily accessible to golfers in Cleveland, Akron, Medina, and the surrounding areas. It is nestled in a residential community that has been the Gunkelman Farms for more than one hundred years. The York Township course is built on beautiful rolling land with many small streams that wind through the property and cascade into the Rocky River. The course features bent grass greens, tees, and fairways with strategic bunkers and five sets of tees on each hole to accommodate golfers of all skill levels. Shale Creek has several distinct natural areas, which help create a beautiful and uniquely different golf experience. Holes one through eight occupy an open area of natural rolling terrain and small streams. The Rocky River is in play on holes 10 through 15. The river and wetlands will create their own distinct character. The finishing holes are on a more traditional Ohio terrain, wooded and rolling, with lakes and streams to navigate. All 18 holes blend naturally into their environment and are fun and interesting to play.
